

# Working Prototype Known Problems Report

**Product Name:** JukeBox

**Team Name:** Four Eights and a Crown

**Date:** November 23, 2016

## List of Known Problems:

- When told to 'Pick a Playlist', when a playlist is clicked in Playlist/ PlaylistAdapter it just returns 'I/PlaylistAdapter: Grabbing playlist Example' and then nothing happens. So when a different playlist is selected, the "currently playing" tab does not show the different playlist's queue.
- When Creating a playlist and a different Wifi name than Cruznet there is an error 'W/EGL\_emulation: eglSurfaceAttrib not implemented' and one is allowed to still play a song
- Queries : Couldn't figure out a straightforward way to grab or update the item from the Firebase
