

## Sprint 3 Report

**Product Name:** Jukebox

**Team Name:** 4 8s and a Crown

**Date:** 11/21/16

### **Stop Doing:**

We need to stop working on the code for the project, since we've hit the deadline.

### **Start Doing:**

We need to start preparing a presentation for the demo of our app and listing problems that we couldn't fix before the deadline.

### **Keep Doing:**

We should keep making sure the app works through scenario testing and finding potential bugs.

### **Work Completed/Not Completed:**

#### **User Story 1: Complete**

As a user, I want my app to be aesthetically pleasing so I can have a better user experience.

#### **User Story 2: Complete**

As a developer, I want the app to be able to make queries through the Firebase database so the app can fetch songs from Spotify.

#### **User Story 3: Incomplete - Backlog**

As a user, I want to have a settings menu so I can contact the developers or customize my app.

We wanted to prioritize having a working app that plays songs in a playlist for Release 1 rather than having this feature that isn't part of the core concept.

#### **User Story 4: Complete**

As a developer, I want to use an sorting algorithm so the app plays a list of songs in the order that is the most pleasing to the user.

### **Work Completion Rate:**

Total User Stories Completed: 3

Total Ideal Work Hours: 31

Total Number of Days: 15

~ 95% Done
